

Air1 radio is a local FM translator in my area. It provides service that is not available through local stations. We would lose a valuable service of music and ministry if Air1 were to be replaced by a LPFM station. Such a station would not be able to provide the breadth of programming, special events, and support of community activities that are provided by Air-1. Please don't take Air1 off the air. An LPFM station would not be able to provide these services. Thank you.
